

PTA Learning Journey(LJ) to Religious Rehabilitation Group(RRG) on 19 Nov

Mosque segment:

I realized that all mosques are built in only one direction which faces Mecca. I also learnt more about the Malay culture, having to contribute to the building of new or refurbishment of older mosques. I also learnt the different actions that are needed during prayers (the "sets") and how male and female Muslims are not allowed to pray together

RRG Exhibition Segment:

I learnt how RRG has assisted radicalised individuals to turn over a new leaf and change the thoughts of terrorism ideology. There are also infringing videos on interviews with those that had the wrong impression of terrorism in other countries and so they did not think thoroughly about the severity of their actions.

Finally, I also learnt more from the exhibition area how terrorist ideology is made and the different stages a person has to go through in order to become "radicalized".

The walls in the area were also very beautifully decorated and informative, this gave us more ideas on the topic of "Only Muslims are terrorist?" and how anyone can become a radicalized individual, even Singaporeans.

Plan B!

When Mdm Foo noticed that the bus had not arrived and would be late, she frantically thought of ideas to solve the problem, going by car. This shows the flexibility of human thinking, and how we as humans cannot be so rigid and must always have a secondary plan if the initial plan fails. There was also much work to be done after the trip regarding admin and reimbursement of Grab fare to the parents who booked GRAB for the ride to RRG.
